

## **Quality, Health & Safety and Environmental Policy**

Our vision is to be the first choice for customers designing and supplying specialist critical systems in industries with the highest safety and regulatory environments. Our mission is to ensure customers survive and thrive in highly regulated industries through expertise and innovation in safety-related solutions. Our primary solutions are neutron monitoring systems, radiation monitoring systems and reactor control systems.

To achieve this, we commit to:

- Satisfy all applicable requirements, including customer, legal, statutory, and adopted standards,
- Consider nuclear safety in everything we do, and to promote a safety culture,
- Ensure that nuclear safety is not compromised by other priorities,
- Promote Quality, Health & Safety and Environmental awareness through suitable training, instruction, and supervision,
- Provide safe and healthy working conditions for the prevention of work-related injury and ill health specific to our health and safety risks and opportunities, including ionising radiation protection,
- Provide for consultation and participation of workers and representatives for health and safety matters,
- Protect the environment, including prevention of pollution, and the control of safeguarded nuclear material,
- Use and communicate this policy to provide a framework for setting objectives,
- Ensure availability of information and necessary resources to achieve objectives and targets,
- Continually improve the business management system and its performance.
